## Cordless communications for every business

EnGenius Durafon from Aristel is the cordless communications tool that goes the distance in any business.

EnGenius Durafon uses two-way radio technology to cover the extra distance needed for factories, farms, offices, warehouses, car dealerships, motels, resorts, caravan parks, nurseries, hospitals homes and more.

Durafon provides mobility, flexibility and security. Voice transmission is secure, so no eavesdropping is possible. Add the many user friendly convenience features and you have the ultimate in versatile, powerful cordless phone systems ideal for business of every size.

## 10 Km Door Station

The DS is compatible with the SN902. It provides access control and can make outside line calls or be made to call a local cordless handset (intercom call).

## The EnGenius advantages

### PERSON-TO-PERSON CALLING

If your people are on the move, no longer do they have to be paged or called on mobile when a call comes in. When installed with a keyphone system, reception can simply direct the call to the individual's EnGenius handset, wherever he or she may be on site. Caller ID to the handset allows the employee to take the call or send to voicemail. Features including group paging (up to nine groups) and broadcast are ideal where emergency contact may be required.

### ULTRA LONG RANGE

With an external antenna, all models can achieve the ultra long range of 5 km to 10 km, depending on environment. The more open the space, the greater the distance covered. A range of over 5km is not unusual for Durafon in open areas.

### PERSON COST SAVINGS

Personnel can keep in contact with no-cost handset to handset calls instead of using mobile phones on site. Consider the savings this could give your business.
