# Pole Overview

**1 INNER METAL POLE STRUCTURE**  
Structural metal pole hot deep galvanized inside and outside by zinc bath immersion.

**2 OUTER RESIN COVER**  
Outer coating of a single piece without joints made of shockproof resin material:  
- Rust and corrosion-free  
- Paste molded colors, UV stabilized  
- Self-extinguishing on fire

**3 EXPANSE**  
High Density rigid polyurethane provides lightweight and durable cohesion between the inner metal post and the outer resin cover.

Ø60mm

## Modular System

All the connection points of Fumagalli poles and lamps are Ø60mm, allowing for many different possible combinations of complete lamps setups.

## Inspection Door

The interior of the hollow pole can be accessed via lockable door, allowing for easy cable inspection.

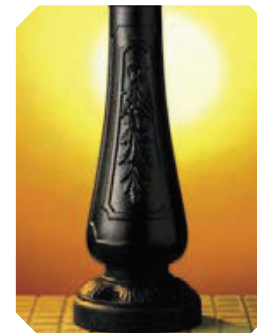

## Anti Corrosion

Thanks to the outer resin material, Fumagalli poles are protected against rust and corrosion, even if subjected to saline or polluted environments.

## No Colour Fading

Fumagalli poles are not painted - the colour comes from the material itself. As such, it does not fade over time.

## UV Ray Stabilisation

Fumagalli products are made of UV stabilised materials to avoid colour fading of the outer surface under the sun, making it ideal in hot and cold climates.

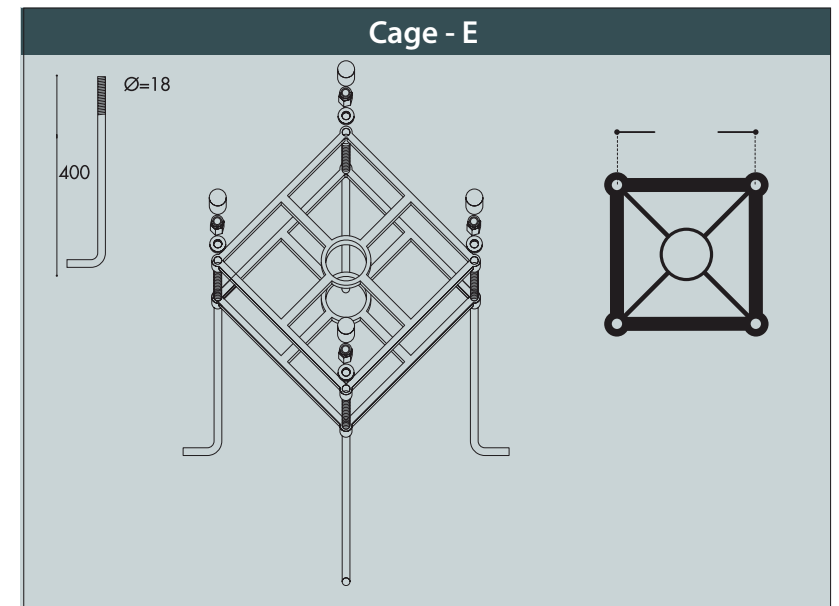

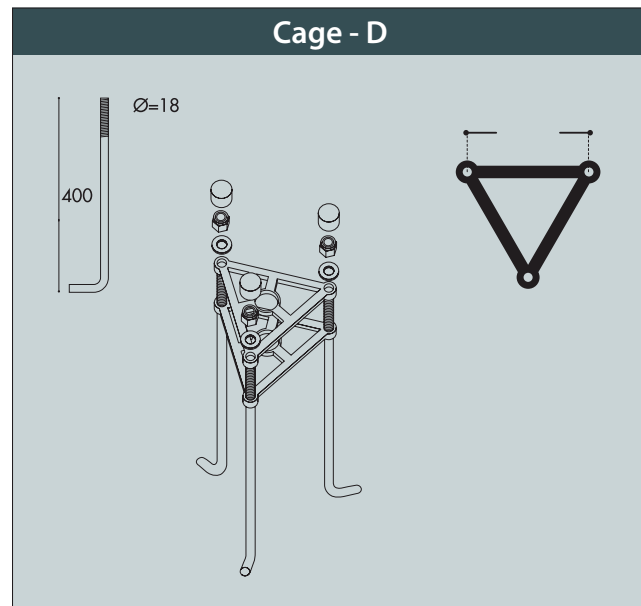

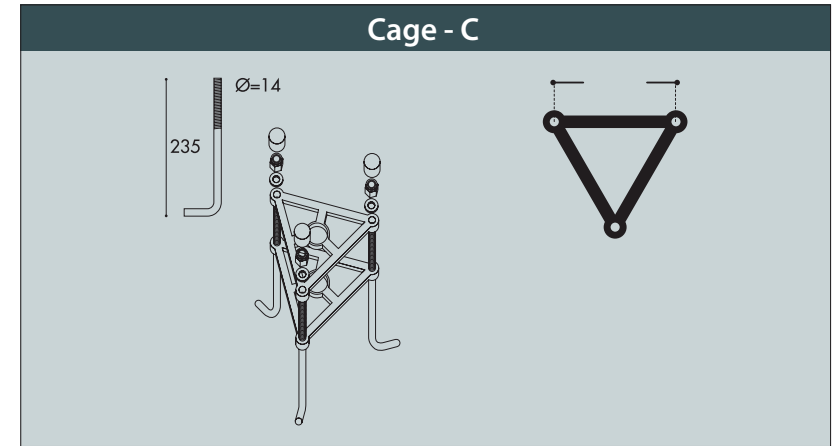

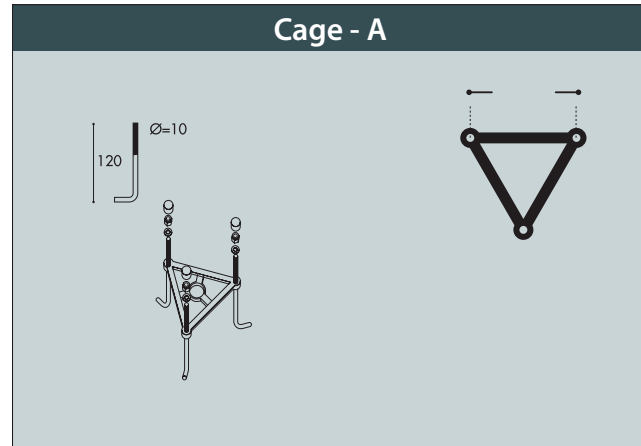

## Discharge & Chemical Protection

The outer resin coating of Fumagalli products isolates the pole from electrical discharges (double insulation Class II), and makes it unaffected by chemical fertilisers or pollutants.

# Pole & Base Cages

All Fumagalli poles come with a suitable cage & screws for mounting.

Refer to the *Cage* column in pole ordering information to see which cage each product comes with.
