Designed to go the distance

EnGenius Durafon from Aristel is the revolutionary cordless phone system that's crystal clear over long distances and ideal where a number of handsets are required.

Durafon uses two-way radio technology to cover the extra distance needed for farms, factories, motels, resorts, caravan parks, nurseries, hospitals; even homes and offices. The more open the space, the greater the distance covered. A range of over 5km is not unusual for Durafon in rural areas.

Durafon provides mobility, flexibility and freedom. Add the many user-friendly convenience features and you have the ultimate in versatile, powerful cordless phone systems ideal for rural properties and businesses of every size.

The industrial strength cordless

The double coated rubber case ensures durability in any work environment. The case is shock-resistant, splashproof and features an integrated hand grip and low profile antenna.

One line or four line models

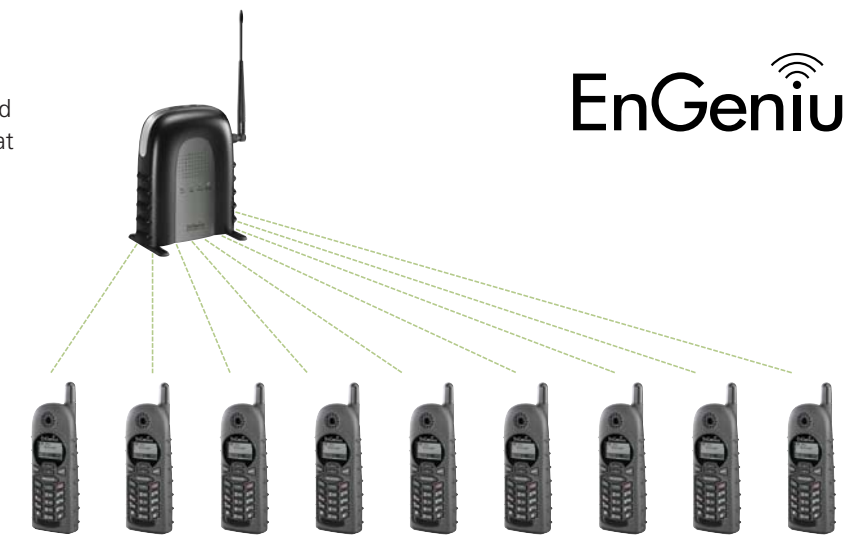

Choose the model that meets your business needs. EnGenius Durafon 1X includes one line per base unit, up to a maximum of four base units and 36 handsets.

EnGenius Durafon 4X offers four lines per base unit, and can support up to 90 handsets.

Expandable system design

EnGenius Durafon is flexible. Additional handsets and base units are available separately. Build a system that grows as your needs grow.

Four base units may be used in PABX working.

EnGenius Durafon

Better by a country mile

Ideal for farms, factories, motels, resorts, caravan parks, nurseries, hospitals, homes and offices.
